

GAVIN NORWOOD

Fall Branch, TN | (423) 217-3708 | gnorwood1998@gmail.com

LinkedIn: [linkedin.com/in/gavin-norwood](https://www.linkedin.com/in/gavin-norwood) | Portfolio: <https://windhelm.dev/>

TECHNICAL SKILLS

- **Languages:** Apex, C, C++, C#, Java, Python, SQL, JavaScript (MERN/MEAN Stack), BASH, PHP, SAP ABAP, Scripting, SOQL
 - **Infrastructure & Admin:** Windows/Linux Server Admin, Ubuntu, Apache2, Active Directory, MSPs, Policies.
 - **Cloud & DevOps:** AWS (S3, CloudFront), CI/CD Pipelines, Jenkins, Docker, Gradle/Maven, Git, Syncro, Atera, Mulesoft, Vonage, UJet, Kubernetes
 - **Engines & Tools:** Salesforce, JetBrains, Microsoft, Jira, Spring Boot, Mulesoft, Heroku, DevOps Center, Claude, Cursor
-

PROFESSIONAL EXPERIENCE

TrxNow | *IT System Administrator* | June 2025 – Present

- **Network Architecture & Infrastructure:** Design, implement, and optimize enterprise FortiNet network topology and infrastructure, ensuring robust security, high availability, and operational redundancy across Linux and Windows server environments.
- **Payment Systems:** Overhauled Salesforce application payment integrations using Apex and SOQL, improving transaction reliability and data security.
- **IT Operations & User Support:** Provide comprehensive technical support across hardware, software, connectivity, and peripherals while managing employee onboarding/offboarding, equipment provisioning, user accounts, and access permissions.
- **Fleet & License Management:** Oversee the procurement, inventory tracking, deployment, and maintenance of 300+ workstations and peripherals using MSP platforms (Syncro, Atera), ensuring timely patching and remote support.
- **Security & System Administration:** Maintain Microsoft 365 and corporate application administration while enforcing security protocols, including endpoint protection, identity authentication, system updates, and cybersecurity incident response.
- **Vendor & Project Coordination:** Lead vendor contract negotiations and collaborate with third-party IT service providers to optimize licensing agreements, reduce overhead, and deliver key technology projects.

CGI | *Java API Developer* | Jan 2022 – Apr 2025

- **API Management:** Developed and maintained RESTful APIs for diverse client portfolios using Spring Boot and Java.
- **Modernization:** Streamlined backend logic for legacy systems, improving data retrieval speeds and integration with external third-party services.
- **Collaborative Dev:** Worked within an Agile environment using Jira for task tracking and Jenkins for automated deployment.

Building Information | *SAP ABAP Developer* | **Fall 2020 – Spring 2021**

- **ERP Customization:** Developed and modified financial and inventory reports using ABAP to meet specific client business requirements.
- **Lifecycle Management:** Managed change requests through Jira, ensuring technical documentation was maintained for all report modifications.

Kingsport General Sessions Court | *IT Specialist (Internship)* | **Spring 2018**

- **Database Migration:** Spearheaded the migration of police department servers from Ruby-based data structures to MySQL, improving query performance, adding new features, and ensuring data integrity.

Windhelm (Independent Project) | *Lead Unreal Engine Developer* | **2021 – Present**

- **Software Architecture:** Designed and programmed a full-scale game in C++ using Unreal Engine 5, managing the entire lifecycle from concept to Steam publication.
- **Performance Optimization:** Implemented advanced procedural generation systems and optimized rendering pipelines (LOD, culling) to maintain high frame rates in complex environments.
- **Live Ops:** Maintain quarterly update cycles, utilizing version control and community feedback to refactor code and deploy new features.

EDUCATION & CERTIFICATIONS

- **BS in Computer Science** | East Tennessee State University | **GPA: 3.50**
- **AAS. in Computer Programming** | Northeast State Community College | **GPA: 3.80**
- **AWS Certified Cloud Practitioner** (2023)

TECHNICAL PROJECTS / HOME LAB

- **Self-Hosted Infrastructure:** Designed, configured, and maintained a custom Ubuntu-based Apache2 web server to securely host personal full-stack MEAN applications, optimizing server performance and access controls.
- **CI/CD Implementation:** Configured end-to-end custom Jenkins pipelines to automate build testing, validation, and seamless deployment execution for various personal software projects.
- **Data Redundancy:** Built and continues to manage a high-capacity NAS server utilizing a RAID 5 array configuration to guarantee fault tolerance, secure data storage, and smooth data migration workflows.
- **Free & Open-Source Software (NorwinLabs):** Architect, publish, and maintain community software repositories and open-source packages for free access to support accessibility needs on GitHub, managing issue tracking, pull request reviews, dependency updates, and release pipelines.
